EXPERIENCE

Full Stack Developer   Date period

Services Ground- Pvt   Location

Company Description

- **Requirement Gathering**: I will thoroughly understand your project goals, target audience, and specific requirements to ensure a tailored solution.
- **Design Development**: I will create a custom, responsive design that aligns with your brand identity while prioritizing user experience. Using the latest web technologies, I will develop the website with clean code, ensuring cross-browser compatibility and fast loading times.
- **Content Management System:** If desired, I can integrate a user-friendly CMS into the website, empowering you to easily manage and update content without any technical knowledge.
  Testing and Quality Assurance: Before delivery, I will rigorously test the website to ensure it functions flawlessly across different devices and browsers. I will also perform SEO optimization to improve search engine visibility.
- **Support and Maintenance**: I provide post-development support and maintenance to address any issues or updates that may arise after the project's completion.
- **Periodic:**
- Built 30+ **Custom interfaces**
  . Implemented 14 new features as defined and scoped by a product team of 12
  · 4 new project designs and **feature improvements**
  ·**Diagnosed** and fixed report **functionality** issues by **troubleshooting**
  ·Suggested 20+ improvements to product design and functionality as informed by user-experience reporting.
  ·**Collaborated** with client service teams to understand and
  solve proposed feature expansions.
- **Simple**:
  · Built pipeline scheduling and execution platform and corresponding front-end to manage and interact with the Platform
  · **Designed** 30+ **front-end Web Interfaces** with full **Responsiveness**.
  ·Architected, implemented and maintained 5 performant and scalable **data-processing** back-end systems.
  · **Worked** with teams to build **web-based** tools to facilitate their **Development** lifecycle.
  · Able to **Organize** my own Workload effectively and **Prioritize** tasks.
  · Can Quickly understand **Business Requirements** and then translate these into functional **Requirements**.
  · Having a **Passion** for customer service & **Responding** quickly to **inquiries**.
  · Can **Manage Multiple Projects** in a **fast-paced**, **Deadline**-**Driven Environment**.
  ·**Adaptable** and able to quickly pick up new **Techniques**.
  ·Understanding of **W3C Standards**, **Web accessibility** & **Best Practice**.
